

1. Project Overview

The Sahal E-Commerce App is a cross-platform React Native mobile application (iOS & Android) supported by a Node.js + MongoDB backend and a Web-Based Admin Dashboard.

Key Features:

- Browse products, categories, and under-price offers
- Purchase items with one-click or standard checkout
- Send gifts and gift cards (in-app and external sharing)
- Register celebration events (birthday, wedding, newborn)
- Track orders and delivery details
- Enjoy VIP/Prime rewards, fast delivery, and personalized deals
- Manage profile, language, and preferences

Admin Panel Features:

- Manage products, categories, banners, homepage content
 - Manage deals, vouchers, gift cards, and celebration campaigns
 - VIP management, reviews, and customer support
-

2. Project Scope

2.1 Mobile App (React Native)

Authentication & Account Management:

- Email login/signup
- Google sign-in
- Phone login (Prime users)
- Forgot password flow
- JWT-based secure sessions
- Profile editing (name, phone, email, profile picture, language)

✨ New Additions:

- VIP/Prime login via phone
- VIP Blue Badge for high-spending/loyal users
- Rewards program for frequent buyers

✨ Credit System

(New Feature will be delivered at the end of this app project)

- Add credits via card/online payment
- View credit balance in wallet
- Send credits to another user
- Accept or auto-receive credits
- Notification on receiving credits
- Use credits during checkout
- Transaction history for credit use & transfers

Home & Discovery:

- Dynamic home banner slider
- Category list and quick-tap access
- Product listing with filters, sorting, and search
- Featured products & most-selling items
- Under-price categories (10, 20, 30, 50)

✨ **New Additions:**

- Homepage ads slider (internal/external promotions)
- Pin products on the home screen
- Weekly, monthly, and daily deals
- "Category of Products Without Typing" quick-tap

Product Detail Experience:

- Product images, description, price, stock
- Add to cart / buy now / wishlist
- Reviews (star + text)
- Similar & related products
- Product sharing (in-app + external)

✨ **New Additions:**

- Extra product images uploaded by shopkeeper
- Product **sharing** inside and outside the app

Cart, Checkout & Orders:

- Add/remove items from cart
- Apply coupons
- Manage delivery addresses
- Checkout summary
- Payment integration (Stripe/PayPal)
- Order confirmation
- Order history & tracking
- Push notifications for updates

✨ **New Additions:**

- One-click purchase
- Postal address auto-fill (city/country detection)
- Detailed purchase history (when, where, how, who delivered)
- Order cancellation rules (5/7/10 days depending on product)

Gift System (Gift Zone):

- Send gifts to users (hide sender/payment info)
- Gift wrap and custom wrapping
- Share gifts externally (WhatsApp, SMS, Facebook)
- Gift cards (20, 30, 50, 100) and redeem at checkout
- Libre gift bundles

✨ **New Additions:**

- Full gift wrap customization

- Advanced sharing and hiding sender/payment info

Celebration Registration:

- Users can register events: birthday, wedding, newborn
- Personalized deals, popups, and recommendations based on celebration

VIP / Prime System:

- Blue badge for VIP users
- Automatic VIP assignment on reaching spending threshold
- Fast delivery & exclusive discounts

Customer Support:

- In-app chat
- Support via call, WhatsApp, Facebook, email
- Direct call request if urgent

Multi-Language Support:

- English & Arabic

2.2 Admin Dashboard (Web)

- Dashboard overview (products, deals, sales)
- Product management (CRUD, categories, images, stock, discounts)
- Banner & homepage content management (ads, pinned products, deals, under-price categories)

- Gift card & coupon management (including Libre bundles & celebration campaigns)
- Review approval & monitoring

2.3 Backend Scope (Node.js + MongoDB)

- JWT-based user authentication (email, Google, phone)
- Product APIs (listing, details, similar, related, under-price)
- Category APIs
- Cart/wishlist APIs
- Order API with tracking, cancellation, and history
- VIP logic (thresholds, discounts, badges)
- Gift card & gift system APIs (create, redeem, share, hide sender/payment)
- Celebration event logic & deals
- Location-based delivery & auto-address APIs
- Push notifications (FCM)
- Admin APIs for products, banners, deals, gift cards

2.4 Deployment Scope

- iOS App Store submission
- Android Google Play Store submission
- App store listing setup (icon, screenshots, description)
- Backend deployment (AWS/Firebase)
- Database provisioning & security

3. Work Breakdown Structure (WBS)

Phase	Task Summary	Deliverables	Duration	Timeline
1	Planning & Setup	Requirements validation, architecture, DB schema, repo setup	40 hrs	Week 1
2	UI Development	Onboarding, login, home, product listing, details	120 hrs	Week 2–3
3	Core Functionalities	APIs integration (product, cart, checkout, wishlist, orders)	160 hrs	Week 4–7
4	Profile & Gift Module	Profile, gift/voucher, celebration, notifications	100 hrs	Week 8–9
5	Backend & Admin Panel	Node.js APIs, DB models, admin dashboard, coupons	160 hrs	Week 10–13
6	QA & Testing	Functional testing, performance, device compatibility	60 hrs	Week 14
7	Deployment	Store submission, build signing, hosting setup	40 hrs	Week 15–16
Grace Period	Bug fixes, client revisions, stabilization	Final refinements	80 hrs	Week 17–18

4. Project Duration

- Estimated Timeline: 16 weeks (4 months)
- Grace Period: 2 weeks
- Total Duration: 18 weeks

5. Project Cost

- Total Cost: PKR 1,100,000/-

6. Deliverables

- iOS & Android Mobile Apps (React Native)
- Admin Dashboard (Web)
- Backend APIs & Database (Node.js + MongoDB)
- Documentation (API + Deployment + Maintenance)
- Store-published applications (App Store + Play Store)

7. Assumptions

- Client provides Figma assets and Appstore/Google play credentials
- Third-party service accounts and costs (developer accounts, hosting, Stripe/PayPal fees, etc.) are excluded
- 2 weeks of post-launch support included

8. Highlighted New Features (Summary)

- 🎉 Celebration-based onboarding & offers
 - 📁 Advanced gift system (in-app + external sharing, Libre bundles)
 - 💳 Sahal Gift Cards (20/30/50/100)
 - 🌐 VIP Customer Badge + Rewards program
 - 🚀 One-click purchase & auto address detection
 - 📷 Extra product images from shopkeeper
 - 🛒 Weekly, monthly, daily deals
 - 🎯 Under-price categories (10/20/30/50)
 - 📌 Pin products to homepage
 - 📢 App-to-app sliding ads
 - 👤 Detailed purchase history (when/where/how/who)
 - 🛑 Cancellation rules (5/7/10 days)
 - ☎️ Multi-support (call, WhatsApp, Facebook, email)
 - 🗣️ Multilingual in mobile app (English + Arabic)
 - 🔁 Advanced recommendations engine
-
